

RFP Response: Beacon Field Services

Procurement request: Customer Support Ticketing Platform Migration

Executive Summary

Beacon Field Services brings strong domain expertise from field-service and support operations, tailoring the ticketing platform for hybrid remote/on-site support teams.

Proposed Solution & Architecture

Ticketing platform extended with mobile field-technician workflows, GPS-tagged ticket updates, and offline-mode support for technicians in low-connectivity areas.

Implementation Plan, Team & Milestones

18-week timeline: Discovery (3wk), Core build (8wk), Mobile app customization (4wk), UAT (2wk), Go-live (1wk). Team of 7 including a dedicated mobile developer.

Milestone	Week	Deliverable
Discovery complete	3	Requirements doc
Core build complete	11	Feature-complete web build
Mobile customization complete	15	Field mobile app
Go-live	18	Production cutover

Commercial Value

Total cost \$312,000, including the mobile field-technician module which is not offered by most competitors.

Line item	Cost (USD)
Core platform	\$180,000
Mobile field module	\$90,000
Year 1 support	\$42,000
Total	\$312,000

Security, Compliance & Risk Controls

SOC 2 Type I certified. Mobile app uses device-level encryption; standard TLS for API traffic. No dedicated security contact for this engagement.

Support Model, Experience & References

Business-hours support with 6-hour SLA, extending to on-call for field-critical issues. 4 similar field-service migrations completed. Two references, both in utilities/field-service sectors.
