

RFP Response: Clearline Software

Procurement request: Customer Support Ticketing Platform Migration

Executive Summary

Clearline Software offers a transparent, no-surprises implementation with clearly itemized pricing and a strong self-service documentation culture.

Proposed Solution & Architecture

Standard modular ticketing platform with a well-documented public API and a marketplace of pre-built, community-maintained integrations. Custom work is scoped and billed transparently as add-ons.

Implementation Plan, Team & Milestones

12-week timeline: Setup (2wk), Core configuration (5wk), Integrations from marketplace (3wk), UAT (1wk), Go-live (1wk). Team of 5, with a named point of contact throughout.

Phase	Duration
Setup	2 weeks
Core configuration	5 weeks
Integrations	3 weeks
UAT & go-live	2 weeks

Commercial Value

Total cost \$210,000, fully itemized with no bundled ambiguity. Every line item, including support tiers, is priced individually in the attached rate card.

Line item	Cost (USD)
Setup & configuration	\$140,000
Marketplace integrations (3)	\$30,000
Year 1 support (Standard tier)	\$40,000
Total	\$210,000

Security, Compliance & Risk Controls

SOC 2 Type I certified. Standard encryption at rest and in transit. Security whitepaper available; no named security contact for this engagement size.

Support Model, Experience & References

Extensive self-service documentation plus business-hours chat support, 8-hour SLA. 4 similar implementations completed. Two references, both citing pricing transparency as a strength.
