

RFP Response: Delta Response Technologies

Procurement request: Customer Support Ticketing Platform Migration

Executive Summary

Delta Response Technologies proposes a hybrid approach combining a proven commercial platform with light custom development for the client's most unique workflow needs.

Proposed Solution & Architecture

Commercial ticketing platform as the core, extended with a small custom module for the client's unique escalation workflow, built and maintained by Delta's engineering team.

Implementation Plan, Team & Milestones

17-week timeline: Discovery (3wk), Core platform setup (5wk), Custom module development (6wk), UAT (2wk), Go-live (1wk). Team of 7, including 2 developers dedicated to the custom module.

Milestone	Week	Deliverable
Discovery complete	3	Requirements doc
Core setup complete	8	Configured core platform
Custom module complete	14	Escalation module
Go-live	17	Production cutover

Commercial Value

Total cost \$370,000, with the custom escalation module accounting for roughly 30% of the budget.

Line item	Cost (USD)
Core platform setup	\$150,000
Custom escalation module	\$150,000
Year 1 support	\$70,000
Total	\$370,000

Security, Compliance & Risk Controls

SOC 2 Type I certified for the core platform; the custom module inherits the same infrastructure security controls. No separate audit of the custom module has been performed.

Support Model, Experience & References

Business-hours support with 4-hour SLA; custom module bugs handled by the original development team, extending response times for that component. 4 similar hybrid custom/commercial engagements

completed. Two references available.
