

RFP Response: Fortify Cyber Solutions

Procurement request: Customer Support Ticketing Platform Migration

Executive Summary

Fortify Cyber Solutions leads with security-by-design principles, positioning this migration as an opportunity to modernize both support tooling and the client's overall security posture.

Proposed Solution & Architecture

Zero-trust architecture with per-request authentication, continuous access evaluation, and a built-in vulnerability scanning pipeline integrated into the deployment process.

Implementation Plan, Team & Milestones

16-week timeline: Discovery & security baseline (3wk), Build (9wk), Security testing (2wk), UAT (1wk), Go-live (1wk). Team of 8 including 3 dedicated security specialists.

Milestone	Week	Deliverable
Security baseline set	3	Baseline document
Build complete	12	Feature-complete build
Security testing complete	14	Pen test report
Go-live	16	Production cutover

Commercial Value

Total cost \$445,000, with roughly a third of the budget allocated specifically to security architecture and testing work.

Line item	Cost (USD)
Implementation	\$300,000
Security architecture & testing	\$95,000
Year 1 support	\$50,000
Total	\$445,000

Security, Compliance & Risk Controls

ISO 27001, SOC 2 Type II certified. Zero-trust network model, continuous vulnerability scanning, quarterly red-team exercises. Dedicated CISO liaison for the engagement.

Support Model, Experience & References

24/7 support with 1-hour critical SLA. 8 similar security-focused migrations in 5 years. Three references, all citing strong security posture improvements post-migration.
