

RFP Response: Highland Data Partners

Procurement request: Customer Support Ticketing Platform Migration

Executive Summary

Highland Data Partners proposes a data-first migration emphasizing clean historical data migration and long-term reporting capability.

Proposed Solution & Architecture

Ticketing platform paired with a dedicated analytics warehouse, enabling deep historical reporting and trend analysis not available in most out-of-box tools.

Implementation Plan, Team & Milestones

20-week plan with heavy emphasis on data migration validation: Discovery (3wk), Data mapping & cleansing (6wk), Platform build (7wk), UAT (2wk), Go-live (2wk). Team of 6, including 2 dedicated data engineers.

Milestone	Week	Deliverable
Data mapping complete	9	Validated data map
Platform build complete	16	Feature-complete build
Go-live	20	Production cutover

Commercial Value

Total cost \$398,000, with roughly 40% allocated to data migration and validation work given the reporting focus.

Line item	Cost (USD)
Data migration & validation	\$159,000
Platform implementation	\$180,000
Year 1 support	\$59,000
Total	\$398,000

Security, Compliance & Risk Controls

SOC 2 Type I certified. Data encrypted at rest; access control via SSO integration. Compliance certifications available on request but not yet finalized.

Support Model, Experience & References

Business-hours support with a 6-hour response SLA. 5 similar data-heavy migrations completed in the last 3 years. Two references available, both citing strong reporting outcomes.
