

RFP Response: Ironclad Secure Systems

Procurement request: Customer Support Ticketing Platform Migration

Executive Summary

Ironclad Secure Systems specializes in high-security deployments for clients in defense, government, and critical infrastructure sectors.

Proposed Solution & Architecture

On-premises or private-cloud deployment option (no shared multi-tenant infrastructure). Air-gapped deployment available. Custom hardened OS images and strict change-control process for all updates.

Implementation Plan, Team & Milestones

11-month timeline reflecting security hardening and accreditation steps: Discovery & threat modeling (8wk), Build (24wk), Security accreditation (6wk), UAT (4wk), Go-live (2wk). Team of 10 including 2 dedicated security engineers.

Milestone	Week	Deliverable
Threat model sign-off	8	Threat model document
Build complete	32	Hardened build
Accreditation complete	38	Accreditation report
Go-live	44	Production cutover

Commercial Value

Total cost \$890,000, reflecting private/air-gapped infrastructure, security accreditation work, and dedicated security engineering staff.

Line item	Cost (USD)
Implementation & hardening	\$650,000
Security accreditation	\$140,000
Year 1 support	\$100,000
Total	\$890,000

Security, Compliance & Risk Controls

FedRAMP-aligned controls, ISO 27001, SOC 2 Type II. Air-gap capable. Dedicated security team with named leads for encryption, access control, and incident response.

Support Model, Experience & References

24/7 cleared support staff, 15-minute critical SLA for accredited environments. 10 similar high-security deployments in 6 years. Three references, all government/defense sector (details available under NDA).
