

RFP Response: Meridian Support Systems

Procurement request: Customer Support Ticketing Platform Migration

Executive Summary

Meridian Support Systems offers an enterprise-grade ticketing platform with a strong focus on regulated industries and audit-heavy environments.

Proposed Solution & Architecture

Monolithic-but-modular architecture optimized for auditability: every state change is logged immutably. Native integrations with major CRMs; custom integrations via a dedicated professional services team.

Implementation Plan, Team & Milestones

9-month conservative timeline prioritizing risk reduction: Discovery (6wk), Build (20wk), Compliance validation (4wk), UAT (4wk), Go-live (2wk). Team of 11 including a dedicated compliance officer.

Milestone	Week	Deliverable
Discovery sign-off	6	Requirements doc
Build complete	26	Feature-complete build
Compliance validation	30	Audit report
Go-live	36	Production cutover

Commercial Value

Total cost \$610,000, reflecting the compliance-heavy scope. Includes a dedicated compliance officer for the full engagement.

Line item	Cost (USD)
Implementation	\$480,000
Compliance validation	\$70,000
Year 1 support	\$60,000
Total	\$610,000

Security, Compliance & Risk Controls

ISO 27001, SOC 2 Type II, and HIPAA-ready controls. Immutable audit logs, field-level encryption, quarterly third-party audits. Named CISO liaison for the engagement.

Support Model, Experience & References

24/7 support with 1-hour critical SLA and a dedicated technical account manager. 15 similar engagements in regulated industries (healthcare, finance) over 8 years. Four references, all in regulated sectors.
