

RFP Response: Pinnacle Enterprise Systems

Procurement request: Customer Support Ticketing Platform Migration

Executive Summary

Pinnacle Enterprise Systems proposes a premium, fully white-glove implementation designed for large, complex organizations with zero tolerance for disruption.

Proposed Solution & Architecture

Enterprise architecture with dedicated failover infrastructure, active-active multi-region deployment, and a custom SLA-backed uptime guarantee (99.99%). Deep customization available across the entire platform.

Implementation Plan, Team & Milestones

10-month timeline with extensive parallel-running period before full cutover: Discovery (6wk), Build (20wk), Parallel run (8wk), Full cutover (2wk), Hypercare (4wk). Large dedicated team of 14 across engineering, QA, and change management.

Milestone	Week	Deliverable
Discovery complete	6	Signed requirements
Build complete	26	Feature-complete build
Parallel run complete	34	Validated parallel run report
Full cutover	36	Production cutover

Commercial Value

Total cost \$725,000, reflecting the premium white-glove scope, multi-region infrastructure, and extended parallel-run period.

Line item	Cost (USD)
Implementation	\$540,000
Multi-region infrastructure setup	\$95,000
Year 1 premium support	\$90,000
Total	\$725,000

Security, Compliance & Risk Controls

ISO 27001, SOC 2 Type II, PCI-DSS Level 1 certified. Dedicated security operations center, 24/7 monitoring, quarterly penetration testing, named CISO-level contact.

Support Model, Experience & References

24/7/365 white-glove support with 30-minute critical SLA and a dedicated pod of support engineers.
20+ enterprise migrations completed over 15 years. Five references, all Fortune 1000 companies.
