

RFP Response: Riverside Managed IT

Procurement request: Customer Support Ticketing Platform Migration

Executive Summary

Riverside Managed IT proposes bundling this migration with an ongoing managed IT services relationship, offering long-term cost efficiency over a standalone project.

Proposed Solution & Architecture

Standard mid-tier ticketing platform, deployed and then fully managed by Riverside's team going forward, including proactive monitoring and monthly optimization reviews.

Implementation Plan, Team & Milestones

13-week timeline: Setup (3wk), Configuration (6wk), UAT (2wk), Go-live (2wk). Team of 5, transitioning to a smaller ongoing managed-services team post-launch.

Phase	Duration
Setup	3 weeks
Configuration	6 weeks
UAT	2 weeks
Go-live	2 weeks

Commercial Value

Implementation cost \$175,000, plus an ongoing managed services fee of \$8,000/month thereafter (not included in the Year 1 total below, shown separately).

Line item	Cost (USD)
Implementation	\$175,000
Ongoing managed services	\$8,000/month
Year 1 implementation total	\$175,000

Security, Compliance & Risk Controls

SOC 2 Type I certified. Standard encryption and RBAC. Security posture reviewed as part of monthly managed-services check-ins rather than a one-time audit.

Support Model, Experience & References

Fully managed support model, 4-hour response SLA, included as part of the managed-services fee. 6 similar migrations paired with managed services in 4 years. Two references available.
