

RFP Response: Vertex Cloud Solutions

Procurement request: Customer Support Ticketing Platform Migration

Executive Summary

Vertex Cloud Solutions proposes a modern, API-first ticketing replacement with strong DevOps automation and CI/CD-driven delivery.

Proposed Solution & Architecture

Serverless architecture on managed cloud functions, event-driven ticket workflows, native webhook framework, and an open API spec published for client-side extension.

Implementation Plan, Team & Milestones

16-week timeline using 2-week sprints: environment setup, 3 build sprints, 2 integration sprints, 1 UAT sprint, go-live. Small senior team of 4 (2 engineers, 1 PM, 1 QA), all dedicated full-time.

Sprint	Focus	Weeks
0	Setup	2
1-3	Core build	6
4-5	Integrations	4
6	UAT & go-live	4

Commercial Value

Total cost \$265,000, fixed-bid, includes 6 months of support. Assumes client uses one of our 5 pre-built connector templates; custom connectors quoted separately.

Line item	Cost (USD)
Implementation	\$220,000
6-month support	\$45,000
Total	\$265,000

Security, Compliance & Risk Controls

SOC 2 Type I certified (Type II planned next year). Data encrypted at rest and in transit. Standard RBAC; no dedicated security contact named for this engagement.

Support Model, Experience & References

Business-hours support with 4-hour response SLA. Completed 3 similar migrations in the past 2 years, primarily for early-stage tech companies. One reference available.
